

Delphi Fuba™ FM Diversity Reception Systems

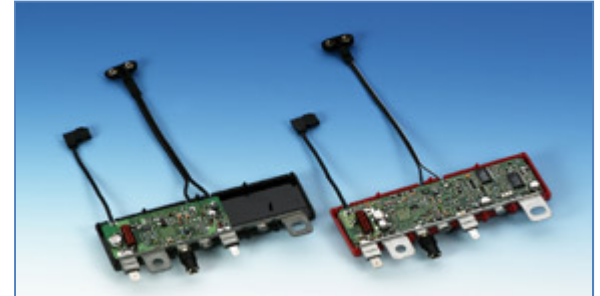

Delphi Fuba™ FM Diversity Reception Systems include a Phase Diversity Adaptive Reception System and Scanning Diversity Reception System. These advanced reception systems select the best-quality FM signal from the available antennas or phase and combine multiple signals to offer better performance than a single antenna. Diversity Reception Systems can be integrated in nearly any part of the vehicle structure and eliminate mast antennas.

▶ Benefits

- Reduces multi-path interference
- Improves fringe area reception
- Enhances sound quality
- Reduces mass
- Complements vehicle styling
- Eliminates lost or stolen antennas
- Eliminates antenna wind noise

▶ Features

- Proven, patented technology
- AM / FM reception
- Overload protection
- Mounting flexibility
 - Glass (backlite, side glass, front glass)
 - Composite body structure (bumper, trunk lid, mirror, spoiler)
