

Delphi Satellite Radio Systems

Delphi was the first automotive supplier to license technology to both XM Satellite Radio and Sirius Satellite Radio and continues to lead the market with millions of systems currently in the marketplace. A supplier of total systems for vehicles compatible with both broadcast formats, Delphi satellite radio systems include a receiver, user interface and antenna. Receivers can be integrated into the radio or remotely located and allow channel name, artist and song title to be displayed so listeners know what is playing.

► Benefits

- Delphi alignment with both broadcast providers
- Delphi system integration expertise
- Total system solution
- Digital-quality music and talk programming
- Wide variety of listening option including Rock, Jazz, Classical, News, Sports and Talk
- Commercial-free music channels
- Program continuity and uninterrupted reception coast-to-coast
 - Users don't drive out of a channel's range
- Enables enhanced data services

► Features

- Satellite broadcast receiver
 - Packaging flexibility
 - Small and compact
 - Text capable
- 2.3 GHz high-frequency signal reception
- Multiple vehicle bus structure compatible

Satellite radio reception requires a monthly subscription to XM or Sirius Satellite Radio service. Reception may be degraded by satellite signal obstruction.

Delphi Satellite Radio Systems bring a wide variety of listening options into vehicles.
