

Delphi Multimedia Interface Modules

Delphi Multimedia Interface Modules consolidate standalone switches into a single intelligent module. The intuitive designs enable user-friendly control of multiple driver convenience and comfort functions to provide an inviting user experience.

▶ The Delphi Advantage

- Robust and proven solutions for all types of ergonomic requests:
 - Push
 - Wheel
 - Rocker
 - Lever
 - Joystick
- Deep experience in TALCS (touch, appearance, lighting, color, sound) customization
- Building block approach helps to reduce design cost and cycle time
- Industry-leading painting solutions for chromed and silicone parts
- Best-in-class backlighting and ambient lighting (LED)
- Vertical integration results in optimum cost and quality

▶ Features

- Multimedia function control
 - Fully customized — functions defined by vehicle manufacturer
 Intuitive and user-friendly control of integrated systems, including infotainment, driver functions and vehicle network

▶ Benefits

- Integrated design helps to reduce weight and cost while increasing the number of available functions
- Offers OEMs an innovative, product differentiator

Delphi Multimedia Interface Modules integrate safety and convenience features in a single module.
