

# Delphi Side Curtain Airbag Module

### ► Description

The Delphi Side Curtain Airbag Module offers enhanced head and neck protection for drivers of commercial vehicles, especially during side impact collisions and vehicle rollovers. The curtain airbag deploys up from a vehicle's door panel and can be designed to include thorax protection.

### ► Benefits

- Door panel deployment
  - Coverage for all seating positions
  - Protection for head, neck, and thorax
  - Coverage of vehicle "hard parts" - roof rail and pillars
- Uses existing technologies
  - Adaptable to most current and newly designed cab configurations
- Extended inflation time
  - Head and neck protection and occupant containment in rollover incidents
